Statement of Achievement

Adama Djibril SAVANE

has successfully achieved student level credential for completing the *AI Fundamentals with IBM SkillsBuild* course, provided by Cisco Networking Academy in collaboration with IBM.
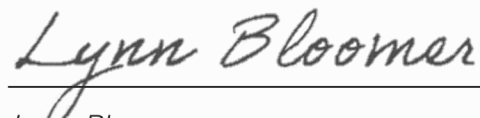

The graduate is able to proficiently:

- Understand fundamental artificial intelligence concepts including natural language processing, computer vision, machine learning, deep learning, chatbots, and neural networks.
- Recognize the ethical implications of artificial intelligence using the five-pillar framework: fairness, robustness, explainability, transparency, and privacy.
- Set up a machine learning project in IBM Watson Studio.
- Explain the skills required for success in the various job roles that use artificial intelligence.
